

Autumn Newsletter 2009

European association of
Veterinary Diagnostic Imaging

British and Irish division

EAVDI (BID) News

Dear Members,

The possibilities of summer are gone and the chill of winter is on the horizon. Fortunately the autumn season is not only a period of transition, it is also the time of roasting chestnuts on the fire, the pumpkins of Halloween, the preparation for Christmas, and ... the autumn newsletter !

This year, the British and Irish division of the EAVDI is not exempt from transitions, as two new officers have been elected during the annual general meeting held this year in Glasgow on the 16th October 2009.

Autumn meeting 2009 report

The 2009 autumn meeting took place in Glasgow from the 15th to the 17th October.

The first day was a resident course in the form of case studies selected by the team from Glasgow University. A large collection of imaging topics were spread over the next two days. This covered the entire

I accepted with great enthusiasm the position of secretary to try and continue the job that Antonella Pugioni has been doing brilliantly for the last 2 years.

Andrew Denning took charge of our finances, which Esther Barrett has managed to keep so healthy for the last 3 years. Thanks to both of them for volunteering their time to the division. We hope that we will be equal to the fantastic job you did.

We also hope to help Gawain, our chairman, to promote veterinary diagnostic imaging with this division of EAVDI, founded by our peers back in 1992 !

Julien Labruyère

Secretary

range of imaging technologies from the radiography of intrathoracic masses to digital teleradiology, as well as large and small animal species from equine pedal MRI to contrast-enhanced abdominal CT.

In addition, cutting-edge science was presented in several abstracts and two excellent film-reading ses-

sions concluded each day.

Finally, we were honoured by the presence of speakers from other disciplines:

Safia Barakzai and Lance Voute, both equine surgeons, did present on skull radiology and bone scintigraphy respectively.

This reminded me that these meetings are

open to people of every level with an interest in veterinary diagnostic imaging, and also offer a great opportunity for continuing professional development (CPD) at an unbeatable price !

See you all very soon for the pre-BSAVA satellite meeting in Birmingham.

Julien Labruyère

Pre BSAVA Meeting 2009 report

The annual pre-BSAVA satellite meeting was held on the 1st April 2009 in the Telford Room, Austin Court at the ICC.

There was a good attendance at the meeting, and the topics included excellent talks from Danielle Gunn-Moore on investigation of feline lower urinary tract disease and Jacques Penderis on prognostic decision making in MRI of the canine brain and spine.

Other well-received speakers included Anna Newitt and Charlotte Whatmough, and Clinical Research Abstracts were presented by Julien Labruyère and Tim Trevail.

There was also the traditional film-reading session, with participation (not always entirely willing...) by the imaging residents attending the meeting.

The committee would like to extend their thanks to Burgess Diagnostics Ltd for their very generous sponsorship of the meeting, and would like to announce that the 2010 Pre-BSAVA meeting will be held on Wednesday 7th April.
